FATIH AKYOL

Senior Frontend Developer

Istanbul, Turkey · muhammedfatihakyol@gmail.com · fatihakyol.com · github.com/mfakyol · linkedin.com/in/mfatihakyol

SUMMARY

Frontend developer with 5+ years of professional experience building modern, production-grade web applications with React, Next.js, and TypeScript. Delivered admin dashboards, e-commerce platforms, and internal business tools across diverse client projects, and led legacy-to-modern migrations (AngularJS/jQuery to React/Next.js). Strong focus on real-time applications, performance, security-minded architecture (BFF, cookie-based auth), and clean component design, backed by hands-on full-stack capability (Node.js, Express, MongoDB) and a habit of shipping tested, localized, Docker-deployed products end to end.

EXPERIENCE

Naxxt Software — Istanbul

Frontend Developer → Senior Frontend Developer | Mar 2021 – Present

- Delivered frontend solutions for numerous client projects at a software agency, including admin dashboards, e-commerce platforms, and internal business tools across different industries
- Owned frontend technical decisions in a cross-functional team of 7 (3 frontend, 4 backend), from architecture and library choices to code standards
- Redesigned and rebuilt the UI/UX of a business-critical admin dashboard from scratch with Ant Design, improving load times, tightening role-based authorization restrictions, and significantly raising the overall user experience
- Resolved security weaknesses of a backend outside the team's control by designing a Backend-for-Frontend (BFF) layer — replacing client-side JWT storage with secure httpOnly cookie-based sessions and enforcing permission checks server-side instead of trusting the client
- Migrated multiple legacy applications — AngularJS 1.x / jQuery and Angular 4–9 codebases — to modern React and Next.js stacks
- Implemented e-commerce frontends with product catalogs, cart and checkout flows, payment integration, and SEO-friendly server-side rendering
- Integrated REST APIs and real-time features (WebSocket / Socket.io) such as live updates and notifications; built responsive, themeable UIs with dark/light modes and EN/TR internationalization
- Wrote unit and integration tests with Vitest and Testing Library; participated in code reviews and mentored junior developers

PROJECTS

Real-Time Chat Application — chat.fatihakyol.com
Production messaging platform: 1:1 & group chats, read receipts, typing indicators, file sharing, presence. Next.js 16, React 19, TypeScript, Zustand, Socket.io, Express, MongoDB · tested with Vitest/Supertest · deployed with Docker Compose + nginx.

Browser Code Editor — codeeditor.fatihakyol.com
Multi-language in-browser code editor with live preview and server-side compilation (Sass, Less, Pug, JSX). React, TypeScript, CodeMirror 6, Express, MongoDB.

Collaborative Whiteboard — draw.fatihakyol.com
Real-time multi-user drawing application with shared boards and JWT auth. React, Konva (canvas), Socket.io, Express, MongoDB.

Lynx (Link Analytics Platform) — lynx.fatihakyol.com
URL shortener with an analytics dashboard: click charts, world-map visualization, GeoIP and device tracking. React, Recharts, Zustand, Express, MongoDB.

More projects with live demos: fatihakyol.com/#projects

SKILLS

Core: JavaScript (ES6+), TypeScript, HTML5, CSS3, responsive & cross-browser UI, accessibility (WCAG/ARIA), web performance (Core Web Vitals, Lighthouse)

Frameworks & State: React 19, Next.js (App Router), Redux Toolkit, Zustand, TanStack Query, Vue 3, Pinia, React Hook Form, Zod, React Native (basic)

UI & Styling: Tailwind CSS, Sass, Ant Design, Mantine, Framer Motion, Figma

Real-Time & Graphics: Socket.io, WebSockets, Three.js / React Three Fiber, Canvas (Konva), CodeMirror

Backend: Node.js, Express, MongoDB, Mongoose, REST APIs, session & JWT authentication, BFF architecture

Testing: Vitest, Jest, Testing Library, Playwright, Supertest

Tools & Workflow: Git, Docker, nginx, AWS, Cloud Run, Vite, Webpack, Gulp, Storybook, ESLint, i18n, CI/CD, Jira, Monday.com

EDUCATION

Erciyes University
B.Sc. Computer Engineering, 2021

LANGUAGES

Turkish (Native)
English (B2 — Upper-Intermediate)
